

"KUDU" NEWS

For FARM and GARDEN

CURRENT PRICE LIST No. 404—Issued 23rd Aug., 1940

SEED SUPPLIES IN WARTIME

In this issue of Kudu News we are including a full range of Agricultural, Vegetable, Flower, Tree and Shrub Seeds; the prices quoted are without engagement and liable to frequent changes as new stocks of each variety arrive.

Conditions in the seed trade generally are at present very much in a state of flux. Many vegetable and flower seed varieties are usually imported from countries now isolated owing to war conditions. The growing of some of these varieties has to be arranged by contract a season in advance so that it is not easy to transfer orders to other countries at a moment's notice when we learn that seed crops now maturing cannot be delivered.

In some instances we have been able to make arrangements for immediate supplies to come from other countries, but the costs are generally on a much higher scale and are reflected in the increased prices as published in this issue.

Fortunately, quite a useful range of varieties can be grown within the Union. For many years we have fostered the development of the seed-growing industry here at the Cape. In the Western Province, with our winter rainfall and dry autumn weather, we have a typical "Mediterranean" climate such as obtains in the south of France, Italy, Morocco, Algeria and California, all areas that have become famous for seeds of good quality. Much of the seed offered by the old-established seed firms in European and American cities originates from the sun-blest, littoral countries mentioned above.

The following kinds of vegetables are at present being successfully propagated for seed production on a commercial scale by or for us in the Western Cape Province—peas, beans,

broad beans, carrot, beet, onion, cabbage, cauliflower, tomato, celery, muskmelon, watermelon, pumpkin, squash, sweet corn and many others.

In the past the industry has been confined mainly to growing varieties of local origin which are obtainable overseas. Other varieties could also be grown but, on account of small scale output, production costs could rarely be brought down to a level that could meet the competition from imported seed. Lack of a seed-growing tradition, poor technique and the need for fuller co-operation between seed-grower and seed-merchant all helped to retard the industry. We are proud of the fact that we were pioneers in

the matter of contract seed-growing in the Western Province; we have several growers whose fathers before them produced seeds for us for many years. The contract system as practised by us helps to counteract the effects of those bugbears of the seed-grower—surpluses and over production.

But now there is a chance for local growers who have mastered the technique of seed production of some particular vegetable—and this requires considerable experience—to get into the business on a bigger scale and so

(Continued on page 26.)

SEEDS FOR SEASON 1940—1941

TERMS OF BUSINESS

NON-WARRANTY

We give no guarantee expressed or implied (and none of our representatives is authorised to vary this condition in any way) as to description, quality or productiveness or as to any other matter of any seeds, bulbs or plants we sell, and we are not in any way responsible for them or in respect of the crop or failure of the crop. All quotations are given and orders accepted only on the understanding that these conditions are agreed to.

KOOPVOORWAARDES

Ons gee geen direkte of indirekte waarborg (en geeneen van ons verteenwoordigers is gemagtig om hierdie voorwaarde te verander nie) met betrekking tot beskrywing, kwaliteit, produktiwiteit of enige ander saak omtrent die saad, bolle of plante wat ons verkoop nie, en ons is op generlei wyse aanspreeklik vir hulle of vir die oes of mislukking van die oes nie. Alle prysopgawes word verstrek en bestellings uitgevoer mits daar met hierdie voorwaardes ingestem word.

C. STARKE & CO. LIMITED.

PRICES

We quote free on rail without engagement, subject to crop failure and being unsold on receipt of order. All previous issues of this Price List are hereby cancelled. Generally we are able to adhere throughout the season to the prices quoted in our Annual General Catalogue; where necessary however they may be varied by alterations published in this Price List.

FORWARDING

Unless instructed to the contrary we will send goods the cheapest way. Postage must be included when cash is sent and where goods are to be consigned to a siding railage must be added. In the event of insufficient money being sent with order we reserve the right to reduce the goods sent accordingly. Only South African grown seeds may be sent by Agricultural Post. By passenger train seeds travel at half Parcels Rate.

SUBSTITUTIONS

When varieties ordered are not available we use our discretion and send suitable substitutes if possible. These are sent for your approval but should they not meet with your requirements they should be returned immediately.

PACKING OF SEEDS

We use the best materials but do not charge for packing unless special packing is asked for.

PACKING OF PLANTS

We charge this up at cost price. Our packing is adequate protection for the rail or post journey as the case may be, but we cannot be held responsible for damage in transit or through delays on the journey.

DIRECTORS:

C. STARKE, Chairman.
H. CHAS. STARKE, General Manager.
E. S. BARRETT, Secretary.
R. A. FORRESTER.

WHERE TO ORDER

Orders may be sent either to Head Office at Mowbray or to our Pretoria Branch. When an account has once been opened at one of our establishments it is advisable always to order from that branch. Where prices are quoted as "Pretoria Prices" or "Mowbray Prices" customers should remember to allow 1/6 per 100lbs. extra for railage on seeds between branches if they place their order with the other Branch. This does not apply to seeds quoted at more than 30/- per 100lbs., which we will supply from either Branch without additional charge.

POSTAL RATES

PARCELS:

Ordinary Parcels for places within the Union, South-West Africa and Colony of Mocambique:

Not exceeding 40z.	2d.
Not exceeding 80z.	4d.
Not exceeding 1lb.	6d.

Not exceeding 7lb.	1/6
Not exceeding 11lb.	2/-

POSTAL "CASH ON DELIVERY" FEES.

For trade charges up to and including £1	1/-
For every additional £1 or part thereof	3d.

RAIL RATES

Seeds declared to be for sowing purposes may be sent per passenger train at half the Parcels Rate. Although most South African grown cereals are carried by goods train at very cheap rates, it is as well to warn clients that imported seeds of many kinds are not always admitted under Rate 7, which is the rate for "Seeds for Farm Sowing." A list of seeds is published in the Railway Tariff Book and only seeds which fall under one of those heads are accepted at Rate 7. All other seeds are carried at Rate 1 unless especially provided for under another rate.

FARM SEEDS

For nearly 40 years Starke's have had a name for reliability and fair dealing and on this essential foundation we have built up a Union-wide trade in Agricultural Seeds of high quality.

Our Seed-cleaning Plant is the largest in South Africa; and many and varied are the types of machines used to obtain those first-grade samples for which we are so well known.

To make farming pay it is more than ever necessary to use the best seed and so obtain the highest yields.

Good Seed is not expensive—less need be sown per acre.

SOIL INOCULATORS FOR LEGUMINOUS CROPS

NITRAGIN is prepared for the following groups of seed. (In ordering always state kind of seed to be inoculated).

Some growers report excellent results from using milk to moisten seed before applying the inoculant.

Group A	Group B
Alfalfa	Red Clover
Hubam	Mammoth Clover
Burr Clover	White Clover
Sweet Clover	Alsike
	Crimson Clover
	Subterranean Clover

Group C	Group D
Garden Pea	Navy Bean
Field Pea	String Bean
Sweet Pea	Wax Bean
Vetch	Kidney Bean
Horse Bean	Garden Bean

Group E	Group S
Cowpea	Soy Bean
Lima Bean	and
Japan Clover	Other Legumes
Peanut	
Velvet Bean	

Price per tin 5/-, postage 6d. extra.
Pretoria Price 5/- per tin, postage 6d. extra.

Each tin contains sufficient to inoculate at least one bushel of seed.

Sunflower, White, Sometimes available	—	—	—	—	

SEED POTATOES

(B)

Owing to war conditions we are not this season importing Scotch grown Seed Potatoes. Following up our successful importation from Canada last year we hope to be in a position to offer several varieties again this season. Customers should write to us for quotations about October.

Meantime we offer, as and when available, South African grown seed-tubers of the following varieties. Prices are not quoted as the market is rather erratic at present.

We pack in cases of 66lbs. net weight or in bags of 150lbs. and are prepared to quote for delivery f.o.r. Rosebank, subject to being unsold on receipt of order.

Annan Banner, main-crop, white skin, very few small tubers, good yielder.

Arran Chief, main-crop, white skin, does well along South-West coastal districts.

Flourball, early main-crop, roundish, pink skin, white flesh, reliable variety.

SEED POTATOES (Continued).

Green Mountain, very much like Ragis Zehn, flesh white and mealy; a Canadian variety that does well in Western Province.

King George V, splendid variety for Western Province, prolific, white skinned oval potato.

President, a Canadian variety similar to Up-to-Date in colour, shape, texture and maturity.

Ragis Zehn, main-crop, rough white skin, does well in the Boland.

Up-to-Date, main-crop, oval, white skin, a favourite variety in summer rainfall areas.

VEGETABLE TRANSPLANTS

Country orders are packed with the greatest care and almost always reach their destination in good condition. We cannot, however, be responsible for loss due to delays, bad handling or bad weather en route.

These are available in season, but we cannot be sure of having all varieties ready for dispatch at any particular date. Unless customers specially instruct us not to, we will substitute some other variety which we think will be suitable when the one ordered is not ready.

SEEDS OF SOUTH AFRICAN NATIVE PLANTS

The flora of South Africa is one of the most varied and beautiful in the world and the following are listed as representing the best of the natural species. They are not all carried in stock at all times but we are usually able to obtain them from reliable growers.

MONOCOTYLEDONS.

	Pkt.	1/8 oz.	1 oz.	4 oz.
Agapanthus africanus (umbellatus), pale and dark blue	6d.	—	3/6	12/6
Agapanthus longispathus, dwarf, medium blue	1/-	5/-	—	—
Agapanthus pendulus, long stemmed, purple	1/-	5/-	—	—
Aloe variegata, red flowers, variegated foliage (50 in pkt.)	6d.	1/9	6/-	20/-
Aristea capitata, evergreen irid, royal blue	6d.	—	3/-	10/6
Babiana, mixed species and hybrids	6d.	—	2/3	7/6
Dierama pendulum, shades of pink	6d.	1/9	6/-	22/6
Dipidax triquetra, semi-aquatic, mauve-pink	1/-	3/6	—	—
Eucomis undulata, the Pineapple Flower	1/-	3/6	—	—
Gladiolus psittacinus, orange flowers, large spikes	—	—	—	—
Galtonia candicans, summer-flowering, white	1/-	3/6	—	—
Hesperanthus Buhrii, petals white above, dark red below	1/-	8/6	—	—
Ixia leucantha, pink and blue	1/-	2/-	6/6	—
Ixia, mixed species and hybrids	6d.	—	3/6	12/6
Lachenalia Bachmanii, short flower, white	1/-	3/6	12/6	—
Lachenalia glaucina, steel blue, medium length	1/-	3/6	12/6	—
Lachenalia juncifolia, soft mauve-pink, short flower	1/-	3/6	12/6	—
Lachenalia liliiflora, species and hybrids, white	1/-	3/6	12/6	—
Lachenalia mutabilis, yellow, blue tip, short flower	1/-	3/6	12/6	—
Lachenalia orchioides, opal shades, medium length	1/-	1/6	5/-	—
Lachenalia ovatifolia, red-purple tips, medium length	1/-	4/-	15/-	—
Lachenalia suaveolens, red-purple, short, fragrant	1/-	4/-	15/-	—

MONOCOTYLEDONS (Continued).

	Pkt.	$\frac{1}{16}$ oz.	$\frac{1}{4}$ oz.	1oz.
<i>Lachenalia unicolor</i> , medium length yellow	1/-	4/-	15/-	—
<i>Lachenalia unifolia</i> , Tulbagh Opals, opal shades	1/-	2/-	6/6	—

<i>Sutera grandiflora</i> , lavender phlox-like flowers	1/-	8/-	30/-	—
<i>Venidium fastuosum</i> , golden yellow, maroon zone	6d.	—	4/-	15/-

(Continued from page 1.)

bring down the present production costs. In passing, however, we must sound a note of warning: those who feel they have the facilities, the inclination and the knowledge should expand their activities gradually. The seed market is a very delicate one; unknown growers cannot easily dispose of their wares and they are advised to enlist the co-operation of a seed-merchant as regards variety, stock-seed, quantity and price before embarking on expansion.

The following essentially South African varieties are noteworthy; they have each been developed and improved by hybridisation, selection and other means, over a long period with some definite object in view, and to suit special conditions such as soil and climatic requirements, resistance

to diseases, ability to survive strong south-east winds and sun-scorch, early maturity, good keeping qualities and, of great importance to the market gardener, the particular points and qualities demanded by his local market.

Wiehahn's Crescent Peas, Stompeul Peas, Victory Beans, Cape Market Carrot, Early Flat Cape Market Beet, Early Flat Yellow Cape Onion, Cape Straw-Coloured Onion, Conradie's Keeping Globe Onion, Cape Spitzkool Cabbage, Doble's Early Cauliflower, Starke's Invincible Cape Cauliflower, Southern Cross Cauliflower, Little Gem Squash, Cape Mountain Sweet Watermelon, Cape Ice Watermelon, Fraserdale Improved Boer Pumpkin, Flat White Boer Pumpkin, Punt's Improved Cape Celery, Houtbaai Tomato.

TREE AND SHRUB SEEDS

EXOTIC SPECIES.

Dahlia Flowered. Colours separately or mixed		1/-	5/-	1/6	7/6
Giants of California. Colours separately or mixed		1/-	5/-	1/6	7/6

Other STARKE-AYRES Publications

Hubbard Squash

The lists of seeds published herein include nearly all those varieties to be found in the 1939 issue of the STARKE-AYRES Annual, which will not be issued this season owing to war conditions; in addition some new introductions of outstanding merit have been listed.

STARKE-AYRES still have on hand some copies of the 1939 Annual. These are valuable as reference books, as they contain hundreds of illustrations and thousands of carefully checked descriptions of various agricultural, vegetable and ornamental plants. The prices, naturally, are out-of-date, but, as far as possible, these have been rectified in this and previous issues of Kudu News. Should any of the numerous Starke-Ayres customers care to have a copy of the 1939 Annual for the sake of the illustrations and as a reference work, the same will be gladly sent free of charge while the present supply lasts.

Other STARKE-AYRES Lists published during 1940 are as follows and copies are still available:

Special Bulb List. The usual season for the despatch of most varieties is from January to March or when the bulbs are in a dormant condition. Imported bulbs will be very scarce next year; many varieties will be unobtainable.

Special Rose List. June to August are the best months for sending out Rose Trees, the trees being dormant or nearly so at that time. For special orders for Rhodesia and Transvaal we are sometimes able to supply a limited quantity in January when, owing to the dry heat, the Rose Trees are semi-dormant and may be transplanted in this condition in Summer rainfall areas. Generally we recommend Winter planting.

Special Shrub and Plant List. These are best transplanted in the Winter and Spring months, but a large proportion are not deciduous and may, therefore, be transplanted throughout

the year. Our list includes all the best varieties of Shrubs, Ornamental Trees, Climbers, Hedge Plants, Herbaceous Perennials, Annual Bedding Plants, Dahlias, Chrysanthemums, etc. A copy will be sent free on application.

Special Hardware List. We hope to publish shortly a special issue of Kudu News featuring Poultry Appliances, Garden Requisites, Florists' Sundries and other hardware lines. We have available at present fully descriptive and illustrated booklets dealing with the KUDU Incubator (Afrikaans and English) and TRUE TEMPER Tools, including the unique "Midget" Seeder. Write to us for the latest prices for any of the above-mentioned lines.

"KUDU" INCUBATOR

Formerly known as

MOE'S PERFECT INCUBATOR

We have to announce that prices for these well-known machines have advanced and are now as follows:

No. E85		85 eggs		£9 0 0
No. E150		150 eggs		£11 0 0
No. E300		300 eggs		£14 2 6
No. E450		450 eggs		£17 15 0
No. E900		900 eggs		£32 12 6

For Cash with Order we will pay the railage to any station within the Union, or customer may deduct 5 per cent. discount and pay the railage himself.

Write to-day for fully descriptive booklet in English and Afrikaans.

SEEDS

STARKE-AYRES' well-known Six-penny packets are obtainable from your local storekeeper or direct from us at the same price—6d. each or 5/- per dozen post free anywhere in the Union.
